

# UNIVERGE® Desktop IP Terminals

DT750 (Touch screen)

NEC's UNIVERGE Desktop IP Terminals provide all the features and functionality of traditional phones with the seamless integration of advanced IP applications.

Integration of voice and data is no longer limited to the network or the PC desktop; it is now in the end-users' hands.

## At a glance

- Modular in design to meet your business demands
- XML open interface allows virtually any application to be delivered to your phone.
- Wideband CODEC for superior speech quality

## Maximising productivity

As an integral part of UNIVERGE360, Desktop IP Terminals connect people with the information, applications and tools that they need to drive business success. These intelligent terminals help your business take service and performance to newer, more profitable heights.

UNIVERGE Desktop IP Terminals are ergonomically designed for natural comfort and facilitate use through an array of menu-driven soft key functions and easy-access function keys. Together, these aspects of the terminal deliver power, versatility and programmability to all users, maximising efficiency and productivity.

Because the entire desktop surface is crafted for user productivity it fosters better speed, service and performance—the UNIVERGE Desktop IP Terminal delivers exactly what your business needs.
